

# HSSCE (undergraduate) Faculty Rep

## ANA MARIA MEDEIROS ASSED B.

My name is Ana Maria, and I am an international student in BSc Biomedical Science. I am an extremely proactive and approachable person, with strong connections with students and academics, which ensures I can represent our faculty and speak up for our needs as a student cohort.

**Respect and Community:** Our faculty is composed of people from different cultures, countries, courses and personalities; I want to strengthen our community, provide a safe space for exchange between students, promote networking and projects across the faculty, and mostly, ensure everyone is seen and respected, regardless of religion, sexuality, or ethnicity.

**Opportunity Highlights:** In terms of opportunities, much is said about clubs and societies, but not a lot about the ones within the faculty. As someone extremely involved in various activities, I believe this should be in the spotlight, and I am determined to make opportunities more accessible, making it less complex and more visible, for all courses.
